## IN WHAT NUMBER PARKING SPOT IS THE RED CAR PARKED?

|  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 16 | 06 | 68 | 88 |  | 98 |

We want our children to become thinkers and collaborators.

# IN WHAT NUMBER PARKING SPOT IS THE RED CAR PARKED? ANSWER: 87 

(The number line is upside-down)

We want our children to become thinkers and collaborators.

# On a scale of one to 

 ten, how much do you honestly enjoy mathematics?

Research suggests that as many as 60\% of adults would rather clean the toilet than work out a maths problem.

An even larger percentage say:

> I was never any good at maths.

- It may come as a surprise that almost half of the working-age population (17 million) of England have numeracy skills equivalent to those expected for an 11 year-old child.
- Adults with poor numeracy skills are twice as likely to be unemployed than those who enjoy some competency in numeracy.
- Those adults with at least basic numeracy skills can expect to earn a quarter more than those who lack the necessary skills to solve basic mathematical problems.
Between a third and a half of people with poor numeracy skills have a desire to improve them but less than 4\% have actually attended any numeracy classes.

## NATIONAL CURRICULUM AIMS FOR CHILDREN

To become fluent in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils develop conceptual understanding and the ability to recall and apply knowledge rapidly and accurately
To reason mathematically by following a line of enquiry, conjecturing relationships and generalisations, and developing an argument, justification or proof using mathematical language
can solve problems by applying their mathematics to a variety of routine and non-routine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions

At we aim for St Anne's our children:

- to be an active participant in their own
- To be confident and numerate.
- to be fluent in their mathematics at the appropriate level.
- to be able to reason about their learning using the correct mathematical vocabulary.
- to be able to apply their skills and knowledge as they progress, through sustainable learning.
- to develop an appreciation that mathematics is a key skill that equips them for life.
- To enjoy mathematics

## AIMS FOR THE WORKSHOP TODAY

To have some fun with maths

To consider why learning basic skills is so important

To look at some of the strategies used in school

To think about ways you can support your children at home.

To ask any burning questions.

## PING PONG

5 TIMES TABLE

One of the most important things you can do to help your child is to support them in learnina their tables.

## I HAVE TRIED AND TRIED

A few children find it almost impossible to retain times table knowledge so they need otner strategies. However, most children can learn 2s, $5 s$ and $10 s$.
Then try to encourage your child to learn all the square numbers e.g.
$2 \times 2,3 \times 3,4 \times 4,5 \times 5$ etc. This will give them a good starting point.

Multiplication Grid

| $\times$ | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| 2 | 2 | 4 | 6 | 8 | 10 | 12 | 14 | 16 | 18 | 20 | 22 | 24 |
| 3 | 3 | 6 | 9 | 12 | 15 | 18 | 21 | 24 | 27 | 30 | 33 | 36 |
| 4 | 4 | 8 | 12 | 16 | 20 | 24 | 28 | 32 | 36 | 40 | 44 | 48 |
| 5 | 5 | 10 | 15 | 20 | 25 | 30 | 35 | 40 | 45 | 50 | 55 | 60 |
| 6 | 6 | 12 | 18 | 24 | 30 | 36 | 42 | 48 | 54 | 60 | 66 | 72 |
| 7 | 7 | 14 | 21 | 28 | 35 | 42 | 49 | 56 | 63 | 70 | 77 | 84 |
| 8 | 8 | 16 | 24 | 32 | 40 | 48 | 56 | 64 | 72 | 80 | 88 | 96 |
| 9 | 9 | 18 | 27 | 36 | 45 | 54 | 63 | 72 | 81 | 90 | 99 | 108 |
| 10 | 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 | 100 | 110 | 120 |
| 11 | 11 | 22 | 33 | 44 | 55 | 66 | 77 | 88 | 99 | 110 | 121 | 132 |
| 12 | 12 | 24 | 36 | 48 | 60 | 72 | 84 | 96 | 108 | 120 | 132 | 144 |

The red numbers indicate how many tables you know if you know 2s,5s 10 s and square numbers.

| $\times$ | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| 2 | 2 | 4 | 6 | 8 | 10 | 12 | 14 | 16 | 18 | 20 | 22 | 24 |
| 3 | 3 | 6 | 9 | 12 | 15 | 18 | 21 | 24 | 27 | 30 | 33 | 36 |
| 4 | 4 | 8 | 12 | 16 | 20 | 24 | 28 | 32 | 36 | 40 | 44 | 48 |
| 5 | 5 | 10 | 15 | 20 | 25 | 30 | 35 | 40 | 45 | 50 | 55 | 60 |
| 6 | 6 | 12 | 18 | 24 | 30 | 36 | 42 | 48 | 54 | 60 | 66 | 72 |
| 7 | 7 | 14 | 21 | 28 | 35 | 42 | 49 | 56 | 63 | 70 | 77 | 84 |
| 8 | 8 | 16 | 24 | 32 | 40 | 48 | 56 | 64 | 72 | 80 | 88 | 96 |
| 9 | 9 | 18 | 27 | 36 | 45 | 54 | 63 | 72 | 81 | 90 | 99 | 108 |
| 10 | 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 | 100 | 110 | 120 |
| 11 | 11 | 22 | 33 | 44 | 55 | 66 | 77 | 88 | 99 | 110 | 121 | 132 |
| 12 | 12 | 24 | 36 | 48 | 60 | 72 | 84 | 96 | 108 | 120 | 132 | 144 |

The red numbers indicate how many tables you know if you know $2 \mathrm{~s}, 5 \mathrm{~s}$ 10 s , square numbers and prime numbers.

| $x$ | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| 2 | 2 | 4 | 6 | 8 | 10 | 12 | 14 | 16 | 18 | 20 | 22 | 24 |
| 3 | 3 | 6 | 9 | 12 | 15 | 18 | 21 | 24 | 27 | 30 | 33 | 36 |
| 4 | 4 | 8 | 12 | 16 | 20 | 24 | 28 | 32 | 36 | 40 | 44 | 48 |
| 5 | 5 | 10 | 15 | 20 | 25 | 30 | 35 | 40 | 45 | 50 | 55 | 60 |
| 6 | 6 | 12 | 18 | 24 | 30 | 36 | 42 | 48 | 54 | 60 | 66 | 72 |
| 7 | 7 | 14 | 21 | 28 | 35 | 42 | 49 | 56 | 63 | 70 | 77 | 84 |
| 8 | 8 | 16 | 24 | 32 | 40 | 48 | 56 | 64 | 72 | 80 | 88 | 96 |
| 9 | 9 | 18 | 27 | 36 | 45 | 54 | 63 | 72 | 81 | 90 | 99 | 108 |
| 10 | 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 | 100 | 110 | 120 |
| 11 | 11 | 22 | 33 | 44 | 55 | 66 | 77 | 88 | 99 | 110 | 121 | 132 |
| 12 | 12 | 24 | 36 | 48 | 60 | 72 | 84 | 96 | 108 | 120 | 132 | 144 |

## EXPECTATIONS IN YEARS 5 AND 6

$540 \div 90$ $620 \div 0.5$
$18 \times 12$ $470 \times 0.5$
$5 / 7$ of 350 $700 \times 0.9$
$8 \times 0.7$ The Government is introducing a times table test for children in $180 \div$ 6 Year 4. They will be expected to know all tables to $12 \times 12$ including related division facts.

It is crucial that children can explain their thinking using the appropriate vocabulary. This not only embeds their own learning but supports the learning of others through hearing quality explanation.

LOOK AT THIS CALCULATION -OH NO, NOT DIVISION!

$$
45,505,525 \div 5
$$

Times tables and place value are really important for success with division.

The use of visual images and practical resources is also crucial to the conceptual understanding of mathematics and supports children's talk.

BEING ABLE TO DRAW A RESPONSE DEVELOPS REASONING AND SHOWS CONCEPTUAL UNDERSTANDING Draw something to prove to me that:
7 is an odd number an odd number divided by 2 will always have a remainder of 1
$\frac{3}{4}$ is equivalent to $6 / 8$
5 is a prime number
$2 / 3$ is not equivalent to $3 / 5$
No words or numbers allowed.

## $200^{\circ}$

- 090

Tom spent $3 / 5$ of his money on a tennis racquet. He had $£ 70$ left.

How much was the tennis racquet?

Children who are used to drawing diagrams or pictures in their mathematics will be more successful with complex problems.

Numicon is one of the many practical resources we use in mathematics at St Anne's.

Practical resources are used all through the school, from reception to Year 6.

CHILDREN NEED IO LEARN MATHEMATICS IN A SENSORY WAY.
"What I hear, I forget; What I see, I remember; What I do, I understand."

- Old Chinese proverb, sometimes attributed to Confucius

## THERE ARE LOTS OF WAYS TO LEARN.

There is no single, exclusively correct learning style in mathematics. We learn things in a variety of ways.

How would you do this calculation?

57-29

## $-30+1$

$29+1 \Omega+2 \pi$
30

## WHAT WOULD CHILDREN NEED TO BE SUCCESSFUL WITH THIS CALCULATION?

$$
57-29
$$

## Counting back strategy

Number bonds
Subtracting a single-digit number from a tens number Subtracting a multiple of ten from any number Partitioning numbers efficiently
Combining numbers to calculate a total

## Counting up strategy

Number bonds to ten
Adding a multiple of ten to any number
Combining numbers to find a total
Understanding the finding the difference model.

$$
\begin{array}{rr}
40 & \\
-50 & 17 \\
-20 & 9 \\
\hline 20 & 8
\end{array}
$$

Children need to know that numbers can be partitioned in different ways to aid calculation.

Partition this number in as many different ways as you can so that one number is always a multiple of ten : 97

## $57-29$

$$
-30+1
$$

This is a higher order strategy and not all children will be able to work in this way so they need a secure strategy that works for them.

## HOMEWORK

There is far more emphasis in the new curriculum on basic skills and homework will reflect this. Expect your child to be asked to practise and consolidate basic skills on a regular basis.

- Homework activities may be based on achieving accuracy or striving for pace.

HOW CAN I HELP MY CHILD AT HOME? MATHEMATICS

- Create a positive view of mathematics - be a mathematician together
- learn tables
- tell the time
- Help your child to understand the importance of mathematics in everyday life
- Support your child when learning basic skills such as number bonds, counting in equal steps and tables
- Help them to see the value of learning these skills
- Value homework activities even if you think your child knows it. They must be fluent and able to apply the skills if learning is to be sustainable
